Publisering og sitering innen medisinsk forskning

En analyse med sammenligninger mellom Norge og andre land, basert på *National Science Indicators On Diskette (NSIOD)*

Oppdrag fra området for Medisin og helse, Norges forskningsråd

Innledning

Bibliometriske FoU-indikatorer måler omfanget av 1) *publisering* i internasjonale vitenskapelige tidsskrifter, og 2) i hvilken utstrekning tidsskriftartiklene blir referert til eller *sitert* i senere artikler i de samme tidsskriftene. *National Science Indicators on Diskette (NSIOD)* er en database med aggregert publiserings- og siteringsstatistikk som dekker data for 92 land gjennom tidsrommet 1981-95. Artiklene er klassifisert under 24 fagfelter, de fleste hjemmehørende under naturvitenskap og teknologi og noen få under samfunnsvitenskap. NSIOD utarbeides av *Institute for Scientific Information* i Philadelphia, USA, som er et kommersielt foretak som også står for utgivelsen av *Science Citation Index* og *Social Science Citation Index* og en rekke andre bibliometriske produkter vedrørende vitenskapelig publisering mm.

Alle fagfeltene i NSIOD-databasen er listet opp nedenfor. De fagfelt som er mest relevante for det medisinske fagområdet - i alt åtte -, er merket med *. Disse er valgt ut for nærmere analyse.

<i>Agricultural Sciences</i>	<i>Law</i>
<i>Astrophysics</i>	<i>Materials Science</i>
<i>Biology & Biochemistry</i> *	<i>Mathematics</i>
<i>Chemistry</i>	<i>Microbiology</i> *
<i>Clinical Medicine</i> *	<i>Molecular Biology & Genetics</i> *
<i>Computer Science</i>	<i>Multidisciplinary</i>
<i>Ecology/Environment</i>	<i>Neuroscience</i> *
<i>Economics & Business</i>	<i>Pharmacology</i> *
<i>Education</i>	<i>Physics</i>
<i>Engineering</i>	<i>Plant & Animal Science</i>
<i>Geosciences</i>	<i>Psychology/Psychiatry</i> *
<i>Immunology</i> *	<i>Social Sciences, general</i>

De åtte fagfeltene må imidlertid ikke betraktes som "rene" medisinske kategorier. F.eks. omfatter *Biology & Biochemistry* kategorier som også ville inngå i en analyse av naturvitenskapen. Et annet eksempel er *Psychology/Psychiatry*. Mens psykiatri regnes under medisin, blir psykologien vanligvis klassifisert som en samfunnsvitenskap. På den annen side kan det være enkelte emner av relevans for det medisinske fagområdet i de fagfeltene som *ikke* blir analysert her. De åtte utvalgte fagfeltene skulle imidlertid dekke det aller meste av det medisinske fagområdet¹.

Et fagfelt er definert gjennom de tidsskrifter som er klassifisert som tilhørende

¹ I Vedlegg 2 gis en oversikt over hvilke disipliner som inngår i de enkelte fagfeltene. Det redegjøres også for grunnlaget for fagklassifikasjonen.

fagfeltet. Hvert enkelt tidsskrift er klassifisert under *ett* fagfelt². Alle artiklene i et tidsskrift blir regnet til tidsskriftets fagfelt³. I den database som ligger til grunn for denne analysen er det ikke mulig å splitte fagfeltene i snevrere kategorier⁴. Dataene er aggregert på nasjonsnivå, noe som muliggjør sammenligninger landene imellom for de ulike fagfeltene. I NSIOD er det ikke mulig å bryte nasjonsdataene ned på de enkelte institusjoner eller miljøer⁵.

I det følgende vil vi se på omfanget av norsk publisering innen hvert enkelt av fagfeltene som i norsk oversettelse betegnes som *Biologi og biokjemi, Klinisk medisin, Immunologi, Mikrobiologi, Molekylærbiologi og genetikk, Neurovitenskap, Farmakologi, og Psykologi/psykiatri*. Antall artikler kan sees som en indikator på produktivitet. Antall siteringer kan tas som uttrykk for i hvilken grad publikasjonen har fått gjennomslag, eller er blitt synliggjort, blant forskerkolleger. Det er alminnelig enighet blant bibliometrikere om at man skal være ytterst varsom med å tolke publiserings- og siteringsfrekvens som et direkte uttrykk for forskningens *kvalitet*. På den annen side kan bibliometrien bidra med nyttige bakgrunnsdata når et fagfelt eller forskningsmiljø skal evalueres.

Her gir vi først en oversikt over omfanget av den norske publisering innen de medisinske fagfeltene, og sammenligner denne med den tilsvarende publiseringsaktivitet på verdensbasis. Deretter ser vi nærmere på publiserings- og siteringsomfanget for de nordiske land. Til slutt tar vi for oss hvert enkelt av de åtte fagfeltene og beskriver disse gjennom grafiske framstillinger.

² Unntaksvis er enkelte tidsskrifter likevel tatt med under to eller flere fagfelter, se Vedlegg 2.

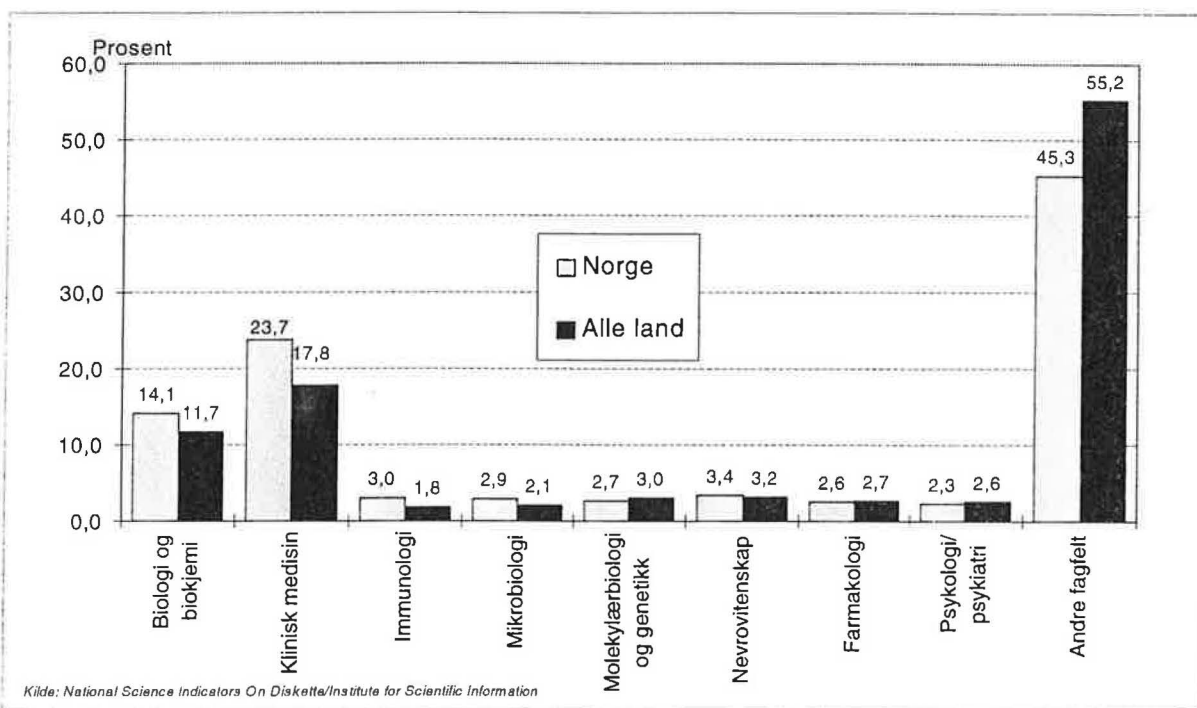

³ Også her fins det unntak, se innledningen i Vedlegg 3.

⁴ Her benyttes standardversjonen av NSIOD. Det finnes også en "Deluxe version" med en mer detaljert faginndeling. I denne utgjør f.eks. *Endocrinology & Metabolism, Gastroenterology and Hepatology, Surgery*, og *Urology* særskilte kategorier som kan analyseres separat. "Deluxe"-versjonen er imidlertid ikke innkjøpt ved NIFU.

⁵ ISI har databaser hvor dette er mulig, bl.a. for alle universiteter i USA. NIFU har bygget opp en særskilt database med grunndata fra Science Citation Index, som dekker for alle norske publikasjoner f.o.m. 1990. Ut fra denne kan norske forskeres publikasjonsmønster analyseres, både på institusjons-, institutt- og personnivå. I tillegg kan man få opplysninger om hvilke tidsskrifter det publiseres i og om samforfatterskap, dvs. hvem som publiserer sammen med hvem.

Norge og verden

I tidsrommet 1981-95 ble det publisert i alt vel 8 millioner artikler i de tidsskrifter som inngår i databasen. I om lag 45.000 av disse hadde forfatteren - eller en av flere forfattere - norsk adresse. Om lag 55 prosent ble publisert i tidsskrifter som faller innenfor det som i denne sammenheng er definert som *medisinske fagfelt*, jf. Tabell 1.

Figur 1 Artikler fordelt på fagfelt i Norge og verden totalt 1981-95.

Tabell 1 Artikler i Norge og i verden totalt 1981-95.

Fagfelt	Norske artikler		Artikler fra alle land	
	Antall	Prosent	Antall	Prosent
Biologi og biokjemi	7.137	14,1	1.030.394	11,7
Klinisk medisin	12.016	23,7	1.575.784	17,8
Immunologi	1.530	3,0	157.926	1,8
Mikrobiologi	1.491	2,9	183.386	2,1
Molekylærbiologi og genetik	1.378	2,7	264.277	3,0
Nevrovitenskap	1.723	3,4	282.841	3,2
Farmakologi	1.304	2,6	236.642	2,7
Psykologi/psykiatri	1.141	2,3	226.694	2,6
Delsum medisinske fagfelt 1)	27.720	54,7	3.957.944	44,8
Andre fagfelt	22.991	45,3	4.882.029	55,2
Sum alle fagfelt 1)	50.711	100,0	8.839.973	100,0
Totalt antall artikler 1)	44.961		8.014.926	

1) Summer/delsummer for fagfelt er større enn det reelle antall artikler fordi enkelte tidsskrifter inngår i flere fagfelt.

Kilde: National Science Indicators On Diskette/Institute for Scientific Information

Tilsvarende andel for alle lands publisering var 45 prosent. I Norge faller altså en klart større andel av den samlede artikkelproduksjon innenfor medisin enn hva tilfellet er for verden totalt. For de øvrige nordiske land gjelder dette i enda større grad - i Danmark og Sverige utgjør artiklene innen medisin 63 prosent av landets samlede publisering. Av de medisinske fagfeltene stod *Klinisk medisin* alene for om lag 43 prosent av alle norske artikler. Det er da også først og fremst på dette fagfeltet Norge skiller seg fra verdensgjennomsnittet.

Norge og de nordiske land

Tabell 2 viser publisering og sitering av nordiske forfattere innen de enkelte medisinske fagfelt for hele perioden 1981-95 samlet. Norge har et lavere antall artikler enn de andre nordiske land bortsett fra Island i alle fagfelt, med ett unntak: i *Psykologi/psykiatri* rangerer Norge som nr. 2 etter Sverige. Tabellen viser også hvor mange - og hvor stor prosentandel - av de publiserte artiklene som er sitert eller referert til av andre artikkelforfattere senere. Antallet slike siteringer er også tatt med.

Citation impact viser forholdet mellom antall siteringer og antall artikler, dvs. hvor mange siteringer en artikkel i gjennomsnitt har mottatt. Når vi holder Island utenfor, har Norge den laveste *Citation impact* i 6 av 8 fagfelt (i *Psykologi/psykiatri* sammen med Finland) og ligger under det nordiske gjennomsnittet i samtlige. Bare i *Immunologi* er *Citation impact* for Norge høyere enn for Danmark og Finland. Forskjellene i impact-verdiene landene imellom er imidlertid ikke alltid så store. Men kommer klart dårligere ut enn både Sverige, Danmark og Finland innen *Molekylærbiologi og genetik*; også innen *Klinisk medisin* er forskjellen klar.

Relative impact viser forholdet mellom et fagfelts *Citation impact* i det enkelte land og *Citation impact* for fagfeltet når alle verdens land inkluderes (*Impact base* i tabellen). Den relative impact for et fagfelt i et bestemt land har således verdien 1 dersom landets artikler siteres i samme grad som alle verdens artikler i fagfeltet. Som det framgår av Tabell 2 siteres nordiske artikler hyppigere enn verdensgjennomsnittet i *Klinisk medisin*, *Neurovitenskap* og *Farmakologi*, men lavere enn verdensgjennomsnittet i de øvrige fem fagfelt. Norge er det eneste nordiske land som har en *Relative impact* lavere enn 1 i alle de åtte fagfelt som undersøkes her.

Tabell 2 Artikler og siteringer for de nordiske land 1981-95¹⁾ (fortsettes)

Land	Antall artikler	Herav siterte artikler	% siterte artikler	Antall siteringer	Citation impact	Relative impact	Impact base

¹⁾ Totalene for Norden er ikke korrigert for samforfatterskap på tvers av landegrensene

De enkelte fagfelt

I det følgende vil vi ta for oss hvert enkelt av de åtte fagfeltene. Gjennom figursett med fire diagrammer per fagfelt sammenlignes Norge med en del andre land. For det første presenteres antall artikler for hele femtenårsperioden under ett for det enkelte land⁶. Videre viser vi det gjennomsnittlige antall siteringer per artikkel (*Citation impact*) i den samme perioden. Derneft gir vi en framstilling av utviklingen i antall artikler fra år til år gjennom perioden for fire nordiske land (Danmark, Finland, Norge og Sverige). For de samme land viser vi utviklingen fra 1981 til 1993⁷ i gjennomsnittlig siteringshyppighet sammenlignet med alle verdens land (*Relative impact*).

Figurene skulle tale for seg selv. Her skal bare nevnes noen poenger.

Når det gjelder *antall artikler*, har Norge en lavere produksjon - perioden

⁶ USA er ikke tatt med i denne figuren fordi landets artikkelproduksjon er så stor at det er vanskelig å framstille den sammen med andre land i en figur.

⁷ Naturlig nok har artikler publisert i den senere år ikke rukket å bli sitert i samme grad som tidligere års artikler. Vi har derfor valgt å utelate artikler fra 1994 og 1995 i figurene som viser utviklingen i gjennomsnittlig siteringshyppighet over tid. De siteringer disse har mottatt er så få at det har liten mening å vise *Relative impact* for dem.

1981-95 sett under ett - enn *alle* de andre land som det her sammenlignes med bortsett fra Island. Dette gjelder alle fagfelt unntatt *Psykologi/psykiatri*, hvor Danmark og Finland har noen færre artikler enn Norge.

Utviklingen i artikkelproduksjonen gjennom femtenårsperioden har vært noe ulik for de ulike fagfelt, selv om antallet norske artikler stort sett har vært økende. Innen *Biologi og biokjemi* har veksten vart svak og nærmest stagnert på 1990-tallet. Det har vært en klart sterkere vekst både i Danmark og Sverige, og forskjellen fra Finland - med omtrent samme utgangspunkt som Norge - er slående. Innen *Klinisk medisin* har det derimot vært en viss økning i antall norske artikler på 1990-tallet, etter en langvarig periode uten økning. Men også her er økningen sterkere for finske artikler. Også i *Molekylærbiologi og genetikk*, *Nevrovitenskap* og *Psykologi/psykiatri* har det vært en viss økning i norske artikler i løpet av perioden. Artikkelproduksjonen i *Immunologi* og *Mikrobiologi* viser derimot ikke økning - perioden sett under ett - og i *Farmakologi* kan det til og med spores en viss nedgang.

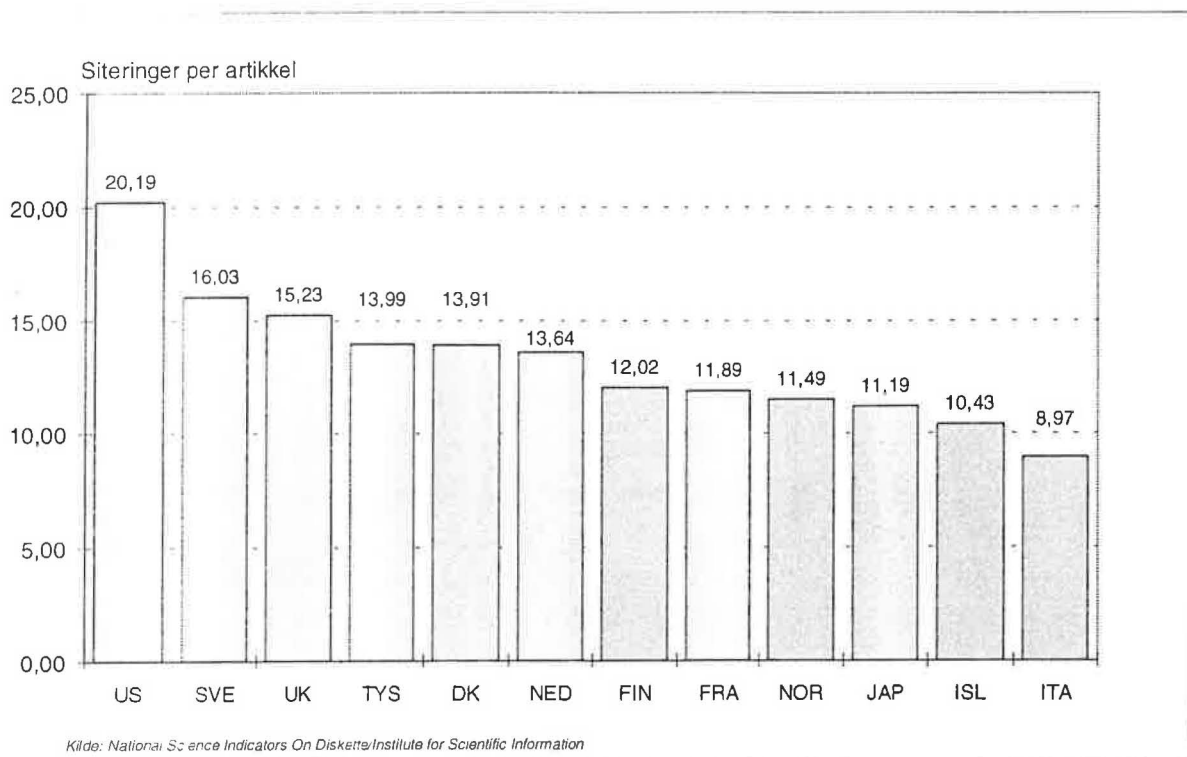

Norske artikler innen *Biologi og biokjemi* siteres i gjennomsnitt 11,5 ganger av senere artikkelforfattere. Dette er hyppigere enn artikler fra Japan, Island og Italia, men mindre hyppig enn artikler fra de øvrige 7 land det sammenlignes med her. I *Klinisk medisin* rangere Norge som nr. 8. For øvrig er siteringshyppigheten for norske artikler sammenlignet med andre land lav innen *Mikrobiologi* og *Molekylærbiologi og genetikk*, høyere innen *Nevrovitenskap* og *Psykologi/psykiatri*.

I alle fagfelt ligger den relative impact for norske artikler gjennomgående under 1 når man ser perioden 1981-93 under ett. I gjennomsnitt siteres altså norske artikler mindre hyppig enn alle verdens artikler i fagfeltet. Lavest er den relative impact i *Mikrobiologi og Molekylærbiologi og genetikk* (rundt 0,6), høyest i *Klinisk medisin* (i underkant av 1). Utviklingen i den relative impact varierer fra fagfelt til fagfelt og viser større utslag i de fagfelt hvor artikkelproduksjonen er lav (f.eks. *Immunologi*) enn hvor den er høy (*Biologi og biokjemi* og *Klinisk medisin*). Sammenlignet med de andre nordiske land er den relative impact for norske artikler gjennomgående lav både i *Biologi og biokjemi*, *Klinisk medisin*, *Molekylærbiologi og genetikk* og *Farmakologi*.

Data og analysetabeller i NSIOD

Vedlegg 1

National Science Indicators On Diskette - NSIOD - er en database fra Institute for Scientific Information (ISI) med publiserings- og siteringsdata for alle verdens land. Her beskrives standardversjonen⁸.

Tidsrom

Dataene dekker 1981-95. Basen oppdateres hvert år.

Innhold

- Totalt antall artikler for hvert enkelt land.
 - Antall artikler som er sitert.
 - Totalt antall siteringer av artiklene.
 - Siteringsandel ("impact"), dvs. gjennomsnittlig antall siteringer per artikkel.
- Summerte data for de enkelte fagfelt og for verdenstotalen foreligger også.

Fagfelter

Alle data kan brytes ned på i alt 24 fagfelt.

For hvert enkelt fagfelt er det spesifisert hvilke tidsskrifter artiklene i basen er hentet fra.

Spesifikasjoner av mulige data:

Data for fagfelt innen det enkelte land:

- A. Antall artikler
- B. Antall siteringer
- C. Siteringsandel, dvs. antall siteringer per artikkel (B/A)
- D. Antall siterte artikler
- E. Prosentandel artikler som er sitert (D% av A)
- F. Relativ siteringsandel for fagfelt, dvs. forholdet mellom fagfeltets siteringsandel for det enkelte land og fagfeltets siteringsandel for alle land samlet (C/N)
- G. Relativ siteringsandel for land, dvs. forholdet mellom fagfeltets siteringsandel for det enkelte land og landets siteringsandel for alle fagfelter samlet (C/V)

⁸ Det er også utarbeidet en "Deluxe version". Denne inneholder data fra 93 land samt 3 geografiske regioner (*Asia Pacific, European Union, og Latin America*). Faginndelingen er fininndelt i 102 kategorier og inkluderer også humaniora.

- H. Prosentandel artikler av antall artikler i fagfeltet for alle land samlet ($A\%$ av L)
- I. Prosentandel artikler av antall artikler for landet for alle fagfelter samlet ($A\%$ av T)
- J. Relativ sitering, dvs. forholdet mellom landets andel siterte artikler og fagfeltets andel siterte artikler for alle land samlet (E/P)
- K. Relativ sitering, dvs. forholdet mellom landets andel siterte artikler og landets andel siterte artikler for alle fagfelter samlet (E/X)

Data for fagfelt for alle land samlet:

- L. Antall artikler
- M. Antall siteringer
- N. Siteringsandel, dvs. antall siteringer per artikkel (M/L)
- O. Antall siterte artikler
- P. Prosentandel artikler som er sitert ($O\%$ av L)
- Q. Relativ siteringsandel, dvs. forholdet mellom fagfeltets siteringsandel og verdens siteringsandel alle fagfelter samlet ($N/\text{\AA}$)
- R. Prosentandel artikler av alle artikler i verden ($L\%$ av \emptyset)
- S. Relativ sitering, dvs. forholdet mellom fagfeltets andel siterte artikler og andelen siterte artikler for alle fagfelter samlet (O/AA)

Data for land for alle fagfelter samlet:

- T. Antall artikler
- U. Antall siteringer
- V. Siteringsandel, dvs. antall siteringer per artikkel (U/T)
- W. Antall siterte artikler
- X. Prosentandel artikler som er sitert ($W\%$ av T)
- Y. Relativ siteringsandel, dvs. forholdet mellom landets siteringsandel og verdens siteringsandel for alle land samlet ($V/\text{\AA}$)
- Z. Prosentandel artikler av alle artikler i verden (T/\emptyset)
- Æ. Relativ sitering, dvs. forholdet mellom landets siteringsandel og siteringsandelen for alle land samlet (X/AA)

Summer for alle land og alle fagfelter samlet

- \emptyset . Antall artikler
- \AA . Siteringsandel, dvs. antall siteringer per artikkel
- AA. Prosentandel artikler som er sitert

Tidsperioder

1. 5-års overlappende perioder, dvs. 1981-85, 1982-86, 1983-87 osv.
2. 1-årsperioder som er sitert opp til siste år. Dvs. data for det enkelte år 1981, 1982, 1983 ... 1995.
3. Hele 15-årsperioden akkumulert.
4. Siste 5-årsperiode, dvs. 1991-95.

Fagfelter og tidsskriftgrunnlag i NSIOD

Vedlegg 2

Hvert enkelt tidsskrift er klassifisert i henhold til disse kategoriene, som svarer til kategoriene i *Current Contents*. *Current Contents* er en database over innholdsfortegnelser i vitenskapelige tidsskrifter, og gir bibliografiske opplysninger om den enkelte artikkel. *Current Contents* publiseres ukentlig i syv forskjellige deler. Hver del dekker tidsskrifter fra beslektede fagfelt. Samsvaret mellom NSIOD-kodene (i standardversjonen) og *Current Contents*-kodene framgår av oversikten nedenfor.

En detaljert oversikt over hvilke tidsskrifter som utgjør datagrunnlaget i de medisinske fagfeltene er inntatt i Vedlegg 3.

Innenfor en og samme *Current Contents Product Code* er et tidsskrift tatt med bare en gang. Det forekommer imidlertid at et tidsskrift inngår under to eller flere produktkoder, f.eks. både under *Life Sciences* og *Agriculture, Biology & Environmental Sciences* hvis tidsskriftet anses relevant for begge områder. I så fall inngår tidsskriftet i datagrunnlaget to ganger, dvs. dobbeltelles. Summen av artikler for alle fagfelter er for Norges vedkommende 12,8 prosent høyere enn det reelle antall artikler. For verden som helhet er det tilsvarende tallet 10,3 prosent. Disse prosentandelene er et uttrykk for overlappingen mellom fagfeltene.

I 2.588 tidsskriftoppføringer innen de medisinske fagfeltene er 180 tidsskrifter oppført 2 ganger og 7 oppført 3 ganger.

En annen kilde til dobbeltelling skyldes at mange artikler har forfattere fra flere land enn ett. I slike tilfeller blir artikkelen talt med én gang for hvert enkelt land.

Tidsskriftoversikt for medisinske fagfelt i NSIOD

Vedlegg 3

Nedenfor er alle tidsskrifter som er kategorisert under de åtte medisin-relaterte fagfeltene i NSIOD-databasen (standardversjonen) listet opp. Listen er ordnet alfabetisk innenfor det enkelte fagfelt. I datagrunnlaget inngår i tillegg dessuten de av artiklene i de bredt anlagte tidsskriftene NATURE, SCIENCE, og PROCEEDINGS OF THE NATIONAL ACADEMY OF SCIENCES OF THE UNITED STATES OF AMERICA som er klassifisert under de relevante fagfeltene.
